Microsoft Windows Server Standard Edition - Software assurance - 2 cores - Open Value - additional product, 3 Year Acquired Year 1 - Single Language

Manufacturer	Microsoft
Manufacturer#	9EM-00519

Description

Windows Server Standard Edition provides a comprehensive server platform that is easy to deploy, manage, and use. It allows businesses to lower total cost of ownership (TCO). Thanks in part to the support of many Microsoft third-party hardware and software partners, Windows Server helps users achieve the greatest return on server investments. Designed for small organizations and departmental use, Windows Server Standard Edition delivers intelligent file and printer sharing, secure Internet connectivity, centralized desktop application deployment, and Web solutions that connect employees, partners, and customers. Windows Server Standard Edition provides high levels of dependability, scalability, and security. MICROSOFT OPEN VALUE Microsoft Open Value is a premium volume licensing offer available under the Open License family. Designed for organizations with as few as five computers, Open Value offers simpler license tracking, greater control over the software upgrade cycle, and better software cost management. Microsoft Open Value offers many benefits: Track licenses more easily. Open Value provides a single agreement to track all licenses on all your desktops, run the same software version on all your PCs, upgrade to the next version at any time, or run a mix of software versions without having to track what is deployed on each desktop. Gain control of your upgrade cycle. Open Value grants you the rights to run any version of the licensed software and to upgrade at any time, when it is most convenient for you. Budget more effectively and save money. Open Value offers predictable annual payments, so you can make better informed decisions about what IT projects need to happen each year. In addition, volume pricing helps stretch software budgets further than retail purchase options. Spread payments. Open Value lets you spread your software costs over three annual payments so you can more effectively manage your software budget and get the software you need now. SOFTWARE ASSURANCE Microsoft's Software Assurance gives you automatic access to new technology and provides productivity benefits, support, tools, and training to help deploy and use software efficiently. With Software Assurance, you receive access to new versions of licensed

software released during the term of your agreement to deploy at your own pace. New Version Rights simplifies the procurement process and shortens the business process cycle, allowing you to reduce the costs associated with acquiring new version releases and immediately take advantage of the latest technology.

Specification
