Manufacturer#	R9Y-00005

Description

Get enterprise-class reliability and protect against spam and malware, while maintaining access to email during and after emergencies. Exchange Online Protection provides a layer of protection features that are deployed across a global network of data centers, helping you to simplify the administration of your messaging environments.

MICROSOFT OPEN VALUE Microsoft Open Value is a premium volume licensing offer available under the Open License family. Designed for organizations with as few as five computers, Open Value offers simpler license tracking, greater control over the software upgrade cycle, and better software cost management. Microsoft Open Value offers many benefits: Track licenses more easily. Open Value provides a single agreement to track all licenses on all your desktops, run the same software version on all your PCs, upgrade to the next version at any time, or run a mix of software versions without having to track what is deployed on each desktop. Gain control of your upgrade cycle. Open Value grants you the rights to run any version of the licensed software and to upgrade at any time, when it is most convenient for you. Budget more effectively and save money. Open Value offers predictable annual payments, so you can make better informed decisions about what IT projects need to happen each year. In addition, volume pricing helps stretch software budgets further than retail purchase options. Spread payments. Open Value lets you spread your software costs over three annual payments so you can more effectively manage your software budget and get the software you need now.

Specification

Product Description	Microsoft Exchange Online Protection - subscription licence - 1 user
