- Open Value Subscription - Level E - additional product, annual fee - Win - All Languages

Manufacturer	Microsoft
EAN	885370533606
Manufacturer#	L5D-00232

Description

Visual Studio Test Professional is an integrated testing toolset that delivers a complete plan-test-track workflow for in-context collaboration between testers and developers, greatly increasing testers' visibility to the overall project. The Visual Studio Test Professional comes with a subscription to MSDN, a comprehensive set of resources including development and test licenses for virtually all of the Microsoft software you need to build and deliver leading-edge applications. Your subscription also includes training, support, and access to critical information for developing on the Microsoft platform. MICROSOFT OPEN VALUE SUBSCRIPTION OPTION With the Subscription option, you pay a single price per desktop (five desktop minimum) to deploy Microsoft technology as the standard across your organization, just as with the Company-wide option. However, the Subscription option provides you with rights to run the software only during the term of the agreement with Microsoft (nonperpetual). SOFTWARE ASSURANCE Microsoft's Software Assurance gives you automatic access to new technology and provides productivity benefits, support, tools, and training to help deploy and use software efficiently. With Software Assurance, you receive access to new versions of licensed software released during the term of your agreement to deploy at your own pace. New Version Rights simplifies the procurement process and shortens the business process cycle, allowing you to reduce the costs associated with acquiring new version releases and immediately take advantage of the latest technology.

Specification
