Microsoft Exchange Server Standard CAL - Licence & software assurance - 1 user CAL - academic, Student - Open Value Subscription - annual fee - Win - All Languages

Manufacturer [Microsoft](#)
Manufacturer# 381-04239

Description

Microsoft Exchange Server Standard CAL provides a feature-rich messaging environment for core users, including rich-client email, calendaring, mobile device access, and anti-spam functionality. A rich Outlook-like experience from any Internet connected computer with a supported browser provides encrypted access to the inbox, powerful search, and the ability to view different types of attachments. Exchange Server ActiveSync technology delivers an improved Outlook e-mail and calendaring experience on mobile devices, while offering enhanced device and security policy control. Organization-wide policy management enables easier and faster auditing, cross-mailbox search, mail flow rules for enforcing encryption and rights management, and routing policies. Built-in defenses against spam and phishing e-mail as well as new antivirus filtering and scanning capabilities provide comprehensive protection.

MICROSOFT OPEN VALUE SUBSCRIPTION OPTION With the Subscription option, you pay a single price per desktop (five desktop minimum) to deploy Microsoft technology as the standard across your organization, just as with the Company-wide option. However, the Subscription option provides you with rights to run the software only during the term of the agreement with Microsoft (nonperpetual).

SOFTWARE ASSURANCE Microsoft's Software Assurance gives you automatic access to new technology and provides productivity benefits, support, tools, and training to help deploy and use software efficiently. With Software Assurance, you receive access to new versions of licensed software released during the term of your agreement to deploy at your own pace. New Version Rights simplifies the procurement process and shortens the business process cycle, allowing you to reduce the costs associated with acquiring new version releases and immediately take advantage of the latest technology.

Specification
